

Usability Study Scenario

- 1. Set the price for bed + breakfast in a double room for the next weekend at € 130 per night.
- 2. Create a reservation with the rate bed + breakfast in a double room in the name of Max Mustermann for Thursday to Sunday next weekend. The guest's email is max@mustermann.de.
- 3. On the night from Friday to Saturday, the Max would like to stay in a single room.
- 4. Change the address of Max and add a billing address.
- 5. Max would like to check in online. Prepare the online check-in. The room code is 3852 and the check-in email should be sent to the guest's email address.
- 6. Max has the status VIP. Let housekeeping know that they should provide the guest with a fruit basket and champagne in the room.
- 7. On the day of arrival, the Max does not check in online, but goes to reception. Create a registration form in the guest's name.
- 8. Check in Max.
- 9. Max makes a deposit of 100€ by Visa.
- 10. Max has arrived by car and parks in the hotel parking lot. Book this as an extra service for the duration of the entire stay.
- 11. On Friday morning, the Max has a visitor in the morning and would like to book an additional breakfast.
- 12. Max does not want breakfast on Saturday. Change the rate for Saturday to overnight stay without breakfast.
- 13. On Friday evening, the Max reports that the shower is faulty. Move him to a new single room for the night.
- 14. Communicate the facility manager to repair the shower.
- 15. Max would like to leave earlier. Cancel the last night of the stay as well as all extra services for this day.
- 16. Max has a Tesla and would like to charge it at the hotel's own charging station. Add this as an extra service.
- 17. On Saturday morning, Max would like to pay the remaining amount on account.
- 18. Create an invoice for the reservation of Max.
- 19. Max asks you to send him the invoice by email.
- 20. Check out Max.
- 21. Housekeeping will let you know on Saturday lunchtime that the room has been cleaned. Set the status of the room to Clean.
- 22. It will take a few days to repair the damaged shower. Lock the room until Wednesday.
- 23. Generate an arrival and departure list for Sunday.
- 24. Generate a catering list for Sunday.
- 25. Ask in the hotel messenger if you can arrive at work half an hour later tomorrow.

Questionnaire 1

1. Visibility of the System Status	Strongly disagree				Strongly agree
The system displays immediate confirmation after booking a room	1	2	3	4	
Status updates are visible when changing the booking or service details	1	2	3	4	
The system provides a visible log or history of all actions taken for a reservation	1	2	3	4	
Issues & Recommendations					
2. Match between System and the Real World					
	Strongly disagree				Strongly agree
The language used in the system mirrors the language used by hotel staff and guests	1	2	3	4	
The system uses terms familiar to both new and experienced hotel employees	1	2	3	4	
Icons and symbols are intuitive and related to real-world hotel operations	1	2	3	4	
Information is presented in a natural and logical order	1	2	3		5
Issues & Recommendations					
3. User Control	Strongly				Strongly

3. User Control	Strongly disagree				Strongly agree
There is a clear option to undo changes made to a guest's booking	1	2	3	4	
Users can easily modify or delete entries without having to navigate through multiple screens	1	2	3	4	
Users have the flexibility to switch between different tasks without having to complete one before starting another	1	2	3	4	
The system provides shortcuts that enable experienced users to perform tasks more rapidly	1	2	3	4	5

Questionnaire 2

Issues & Recommendations					
4. Consistency	Strongly				Strongly
UI elements behave uniformly across different sections of the system	disagree		3		agree
Standard terminology is used throughout all user interactions	1	2		4	5
Consistent visual elements are used for error messages, alerts, and notifications	1	2	3		5
Issues & Recommendations					
5. Error Prevention	Strongly disagree				Strongly agree
Warnings are issued after conflicting information have been entered			3	4	•
The system validates data entry to prevent common input errors	1	2	3	4	
Confirmation prompts appear before finalizing potentially important actions	1	2	3	4	5
The system checks for double bookings and availabilities before confirming a reservation	1	2	3	4	
Issues & Recommendations					

The user interface does not distract from solving tasks

The look and feal optimizes space and prioritizes task-related information

Aesthetic elements do not interfere with the functionality of the system

Questionnaire 3

Proposition menus and auto-fill features reduce the need for memory use 1 2 3 4 5 5 6 6 6 6 6 6 6 6 6 6 6 6 6 6 6 6 6		Strongly disagree				Strongly agree
Frequently used tools are prominently placed on the dashboard 1 2 3 4 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5	Interface elements are logically organized	1	2	3	4	
ssues & Recommendations 7. Flexibility Strongly disagree signer Sues can configure the dashboard to display information relevant to their role 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 3 4 6 Sulk actions are possible, such as checking out	Dropdown menus and auto-fill features reduce the need for memory use	1	2	3	4	5
7. Flexibility Strongly disagree agree Such as checking out multiple guests at once The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation 3. Aesthetic	Frequently used tools are prominently placed on the dashboard	1	2	3	4	
7. Flexibility Strongly disagree Strongly disagree Users can configure the dashboard to display information relevant to their role 1 2 3 4 6 3ulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation ssues & Recommendations	Different choices are made clear	1	2	3	4	5
Strongly disagree Strongly agree Users can configure the dashboard to display information relevant to their role 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation ssues & Recommendations	Issues & Recommendations					
Strongly disagree Strongly agree Users can configure the dashboard to display information relevant to their role 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation ssues & Recommendations						
Strongly disagree Strongly agree Users can configure the dashboard to display information relevant to their role 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation ssues & Recommendations						
Strongly disagree Strongly agree Users can configure the dashboard to display information relevant to their role 1 2 3 4 6 Sulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation ssues & Recommendations						
Users can configure the dashboard to display information relevant to their role 1 2 3 4 6 Bulk actions are possible, such as checking out multiple guests at once 1 2 3 4 6 The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation ssues & Recommendations 3. Aesthetic	7. Flexibility	Strongly				Strongly
Bulk actions are possible, such as checking out multiple guests at once 1 2 3 4 © The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation 1 2 3 4 © ssues & Recommendations	Users can configure the dashboard to display information relevant to their role			(3)	4	
The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation ssues & Recommendations B. Aesthetic						
ssues & Recommendations Same and the state of the state						
3. Aesthetic	Bulk actions are possible, such as checking out multiple guests at once	1	2	3	4	
Strongly Strongly disagree agree	Bulk actions are possible, such as checking out multiple guests at once The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation					
8. Aesthetic Strongly Strongly disagree agree	The system supports multi-tasking, allowing users to open multiple tabs or					
8. Aesthetic Strongly Strongly disagree agree	The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation					
8. Aesthetic Strongly Strongly disagree agree	The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation					
8. Aesthetic Strongly disagree agree	The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation					
	The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation					
The interface is clutter-free, focusing only on necessary elements	The system supports multi-tasking, allowing users to open multiple tabs or windows simultaneously without performance degradation					Strongly

Questionnaire 4

Issues & Recommendations					
9. Error Handling	Strongly				Strongly
The system clearly indicates when an error occurs, using both visual cues (like color changes) and textual descriptions	disagree	2	3	4	agree
Users are guided through the steps to recover from common errors	1	2	3		5
The system includes proactive error prevention mechanisms, such as validation checks	1		3	4	5
The system maintains a consistent approach to error handling across all modules	1	2		4	5
Issues & Recommendations					
10. User Guidance					
10. User Guidance	Strongly disagree				Strongly agree
Step-by-step guides are provided for complex procedures	1	2	3	4	
The system's help documentation is available within the application	1	2	3	4	
Complex terms are explained in detail in the application	1	2	3	4	
Issues & Recommendations					

Questionnaire 5

Participant

Overall Feedback

The software provides a good usability

Strongly disagree									Strongly agree
1	2	3	4	5	6	7	8	9	10

Further remarks (positive, negative, features requests)

begienne!

Einen Feature Request hatte ich allholings:

Die Bredung von Krankheitstagen, Arbeitsstunden und Urlandstagen über einen Gewählten Zeitraum augezeigt zu bekannnen, idealeswise nur für Manager eingelisar.
